

VAREC 4210A SERIES EMERGENCY PRESSURE VENT AND MANWAY COVERS

Provides access and emergency protection against costly ruptures

FEATURES

- Hinged cover provides a fixed pivot point, ensures proper reseating and added safety.
- Cover cannot separate from the base.
- Easily lifted open to provide a large, unobstructed passage for easy tank access.
- 'Tite seal' diaphragm design ensures minimum vapor leakage losses to 1 CFH at 90% of setting.
- Durable PTFE seal backed by a non-asbestos cushion disc for added resiliency and reduced leakage.
- PTFE diaphragm protects the cushion disc from direct contact with tank vapors in chemical and low temperature applications.
- Carbon steel units have steel bases with a welded and machined stainless steel tip on the nozzle perimeter to ensure a corrosion resistant seating surface.
- Optional stainless steel bases for chemical and low temperature applications.
- Flange mounting dimensions conform to either API 650 or ANSI 150#.
- Optional vacuum valve available in cover.

GENERAL APPLICATION

The 4210A Series is designed to provide emergency venting of low pressure storage tanks and vessels.

TECHNICAL DATA

Materials:	Carbon steel, stainless steel, aluminum
Sizes:	18", 20", 24" (450, 500, 600 mm)
Connections:	Flanged
Pressure settings:	2" wc to 2 psig (5 to 160 mbar)
Vacuum settings:	-1.4" wc to 20" wc (-3.5 to 50 mbar)

VAREC 4210A SERIES EMERGENCY PRESSURE VENT AND MANWAY COVERS

SPECIFICATIONS

Sizes

18" - 24"

Connections

Drilled to 150# ANSI dimensions, flat face flange

Drilled to API 650 dimensions, flat face flange

Setting ranges

Pressure 2" wc to 2 psig

Vacuum -1.4" wc to -20" wc

Materials of construction

Base	Carbon steel with stainless steel seating surface
	316 Stainless steel
	Aluminum
Pallet	Carbon steel
	Stainless steel
	Aluminum
Diaphragm	PTFE
Hinge arm	Steel - standard
