

ANDERSON GREENWOOD WHESSOE MODEL 500B FLAME ARRESTERS

An end-of-line long burn flame arrester designed to prevent the propagation of a flame

FEATURES

- Fabricated construction.
- Replaceable element.
- Sprung weather cover.
- Advanced crimped stainless steel element construction as standard. Other materials available.
- Suitable for endurance burning.
- Independently tested and certified.
- Manufactured to ISO 9001:2008.

GENERAL APPLICATION

The 500B is mounted on tanks or on the end of discharge pipes to stop flames entering the process. It allows for stabilized burning for an unspecified time.

TECHNICAL DATA

Materials:	Carbon steel, stainless steel
Sizes:	DN 15 to 350 [1/2" x 14"]
Connections:	Threaded or flanged
Temperature range:	-20° to +60°C (-4° to +140°F)
Gas groups*:	IIA, IIB, IIB2, IIB3, IIC
Certification:	ATEX Directive 94/9/EC; PED 97/23/EC

* Only available for hydrocarbon gas

ANDERSON GREENWOOD WHESOE MODEL 500B FLAME ARRESTERS

STABILIZED BURNING

Stabilized burning is the steady burning of a flame stabilized at or close to the flame arrester element. The 500B allows for stabilized burning for an unspecified time. A fusible link holds the weather cover in the normal position. During an endurance burn, extreme temperatures are generated which cause the fusible link to melt, eventually releasing the cover and allowing the heat to escape.

MATERIALS AND CONNECTION OPTIONS

Materials

Carbon steel and stainless steel.

Connection pipe size

Threaded DN 15 to 50 (1/2" to 2")

Flanged DN 15 to 350 (1/2" to 14")

NOTE

Accessories, special materials and connections are available on request.

Gas groups

- IIA
- IIB1

Only available for hydrocarbon gas.

NOTES

Some sizes of 500B are supplied with multiple elements, which fit onto pipe arms extending from a central inlet pipe. These are suitable for endurance burning applications.

The largest diameter element used with the 500B is DN 200 (8"), inlet diameters DN 100 (4") and above all use this element and sizes DN 100 - 150 (4" - 6") have single elements whilst sizes above DN 150 (6") have multiple elements. Standard elements are double the pipe size.

500B ENDURANCE BURN (EC VERSION)

HIGH TEMPERATURE (+200°C (+392°F)) APPLICATIONS

Explosion group	Gap width	Inlet size
IIB1 (IIA)	0.8 mm (0.032")	DN 15 - 350 (1/2" - 14")

SELECTION GUIDE

Example:	500B	50	EC	100	19	80	S3	S3
Model	500B							
Connection diameter, mm (in)								
Threaded	DN 15 to DN50 (1/2" to 2")							
Flanged	DN 15 to DN 150 (1/2" to 6") – element sizes to DN 200 (8")							
	DN 200 to DN 350 (8" to 14") – element sizes > DN 200 (8")							
Element code								
EC								
Element diameter, mm (in)								
	DN 50 to DN 100 (2" to 4") – screwed connection							
	DN 50 to DN 200 (1" to 8") – flanged connection							
	DN 200 (8") multiples –flanged connection > DN 200 (8")							
Element width, mm (in)	19	19 mm (0.75")						
Cell height, mm (in)	80	0.80 mm (0.032")						
Element material	S3	Stainless steel						
	C	Carbon steel						
Body material	S3	Stainless steel						
	C	Carbon steel						

NOTES

All sizing and selection must be conducted by the factory.
